A SAMPLE WORLD: STILLWATER AT DUSK

Give players reasons to explore.

A quick guide to the interactions in the sample alpine world, plus ideas for expanding it into a richer playable experience.

In the sample world

Available in the local demo

↗ Explore the landscape

Walk around the lake, forest and shore, and look around freely in first person.

W A S D to move · mouse to look

✦ Collect fireflies

Find three glowing fireflies hidden around the world. The HUD tracks your collection.

Walk into a firefly

i Discover field notes

Visit four marked spots to reveal short bits of story and information about the place.

Click a marker or press E

◦ Toss stones into the lake

Throw a stone and watch for ripples on the water, with a small splash sound.

Click to throw

Light the campfire

Toggle the fire and trail lantern to change the warmth and glow around camp.

Use the on-screen interaction

☼ Change the atmosphere

Shift the scene toward golden hour, add mist, and switch ambient sounds on or off.

Use the world controls

Controls can vary by view. Click a hotspot when the mouse is free, or aim at it and press E while exploring. Press Esc to release the mouse or close an open note.

What you could add next

Build on exploration with interactions that give players goals, choices and new ways to experience the same place.

CHARACTERS, GOALS & DISCOVERY

Characters and dialogue

Add visitors, guides or wildlife that react when approached and share optional dialogue.

Quests and objectives

Give players a trail to follow, such as lighting beacons or finding supplies before nightfall.

Secrets and collectibles

Hide rare objects, clues or locations and reward players for careful exploration.

Keys and locked areas

Let discoveries unlock a cabin, cave, chest or alternate route through the world.

WORLD SYSTEMS & PLAYER OPTIONS

Switches and movable objects

Open doors, move props, activate mechanisms or rearrange pieces of the scene.

Weather and time

Cycle through dusk, night and dawn, or add rain, snowfall, wind and changing fog.

Maps and photo mode

Offer a map, saved viewpoints, screenshots or a way to mark places worth revisiting.

More ways to play

Add touch or gamepad controls, alternate player controllers, or multiplayer exploration.

A note about generated worlds

Interactions can be layered over a generated world using hotspots, UI and effects. Changes that reshape terrain or permanently move scene objects may need editable 3D geometry or a separate object layer.

1 · Start small

Pick one clear goal or collectible.

2 · Add feedback

Use sound, light, animation or a short message.

3 · Connect the world

Link discoveries to new places and choices.
